“DIGITAL TRANSFORMATION ONLY CREATES VALUE WHEN IDEAS ARE TURNED INTO WORKING SYSTEMS THAT SCALE.”

INTRODUCTION

Artur is a Digital Transformation & AI Delivery Lead with over 11 years of experience delivering software, automation, and AI-driven products across startup and enterprise environments.

He works at the intersection of technology delivery and business impact, leading organisations from early-stage concepts through to fully functional, scalable products. His strength lies in combining hands-on build capability with structured delivery leadership – enabling businesses to move from ideas and fragmented processes to working, value-generating digital solutions.

His experience includes building AI-powered products, digitising legacy operations, and establishing delivery frameworks that improve speed, efficiency, and scalability across organisations.

HOW I CAN HELP YOUR BUSINESS

- **Digital Product Delivery & Platform Build:** Leading the end-to-end delivery of digital products – from initial concept and MVP through to scalable, production-ready platforms
- **AI & Automation Implementation:** Designing and implementing AI-driven solutions using LLMs and automation tools to streamline workflows and enhance decision-making
- **Digital Transformation & Process Modernisation:** Transforming manual and legacy processes into structured, efficient digital platforms that improve operational performance
- **Delivery Leadership, PMO & Scalable Execution:** Establishing delivery structures, governance, and Agile frameworks to improve predictability, team performance, and scalability
