## CONNECT WITH ME:

Clive Wragg supports organisations that need to improve cyber security, reduce risk, and strengthen resilience without creating unnecessary complexity or disruption. He brings senior leadership and practical execution experience to security-critical environments, including professional services and legal organisations, where confidentiality and continuity are non-negotiable.

**“SECURITY ONLY WORKS  
WHEN CONTROLS, PEOPLE,  
AND OPERATIONS ARE  
ALIGNED – AND  
PRACTICAL.”**

## INTRODUCTION

Clive Wragg is a senior cyber security and business resilience leader with extensive experience strengthening security posture, reducing risk exposure, and embedding governance across complex operational environments. He specialises in security-led transformation where confidentiality, continuity, and trust are critical—particularly within regulated and high-risk sectors. Clive brings a pragmatic, business-aligned approach to security, ensuring policies, controls, and technologies translate into effective day-to-day protection. At Grant & Graham, he supports clients across technology, engineering, professional services, and legal environments—helping organisations protect critical systems while enabling sustainable business operations.

## HOW I CAN HELP YOUR BUSINESS

- **Cyber Security Strategy & Governance:** Designs and implements pragmatic security strategies and governance frameworks—aligning cyber risk, operational controls, and regulatory expectations with real business needs.
- **Cyber, Operational & Information Security:** Strengthens security across environments, operational systems, and information assets—reducing exposure while improving visibility, accountability, and control.
- **Risk Management, Controls & Assurance:** Embeds risk, control, and assurance models that stand up to audit and regulatory scrutiny—turning security policy into consistent operational behaviour.
- **Business Continuity & Resilience Enablement:** Helps organisations prepare for, respond to, and recover from security incidents—protecting service continuity, reputation, and stakeholder trust.
