**"TRANSFORMATION SUCCEEDS  
WHEN TECHNOLOGY,  
OPERATIONS AND LEADERSHIP  
MOVE IN THE SAME DIRECTION."**

## INTRODUCTION

Gavin is an Enterprise ERP Transformation Programme Leader with over twenty years of experience delivering complex technology and operational transformation across supply chain, logistics, and digital platforms. He works with leadership teams to modernise enterprise systems, align operations with scalable technology platforms, and bring structure and momentum to large transformation programmes.

His experience includes ERP and operational platform transformations in distribution and high-volume fulfilment environments – challenges commonly shared by retail organisations operating complex supply chains.

## HOW I CAN HELP YOUR BUSINESS

- **ERP Transformation Leadership:** Leading complex ERP transformation programmes that align technology delivery with business operations and long-term organisational strategy.
- **Supply Chain & Operational Platform Integration:** Connecting ERP, supply chain, and automation platforms to create scalable and reliable operational ecosystems.
- **Programme Stabilisation & Delivery Governance:** Bringing structure, clarity, and strong governance to complex transformation programmes to accelerate delivery and reduce risk.
- **Operational Efficiency & Process Optimisation:** Improving business performance by aligning systems, data, and operational processes across finance, supply chain, and distribution.
