ENABLE PROGRESS – NOT
INTRODUCE UNNECESSARY
RISK.”**

INTRODUCTION

Kevin is a senior security and digital transformation consultant with over 15 years' experience delivering technology-led change across complex, security-sensitive environments in the UK and overseas. With a background spanning BT, the Ministry of Defence, and specialist consultancy organisations, he bridges technical depth with business clarity – translating complex requirements into practical, secure, and commercially aligned solutions.

His expertise lies in digital transformation, cyber security, and business analysis, where he helps organisations simplify complexity, improve decision-making, and implement sustainable change. Kevin is known for his structured thinking, calm delivery style, and ability to align stakeholders across technical and non-technical teams.

HOW I CAN HELP YOUR BUSINESS

- **Cyber Security & Risk Reduction:** Strengthen your organisation's security posture through practical controls, structured risk assessment, and clear governance aligned to real operational exposure.
- **Digital Transformation Delivery:** Design and implement technology-led change programmes that improve efficiency, resilience, and long-term scalability.
- **Business Analysis & Requirements Engineering:** Clarify complex requirements, align stakeholders, and translate technical possibilities into actionable, outcome-focused roadmaps.
- **Complex Systems & Stakeholder Alignment:** Bridge the gap between technical teams and executive leadership, ensuring initiatives are commercially viable, technically sound, and realistically deliverable.
