CONNECT WITH ME:

Looking for a senior technology leader who can stabilise IT fast, modernise cloud and security, and deliver change that actually sticks?

Rocco supports organisations through interim and fractional leadership, bringing clarity, structure and execution across technology strategy, cyber resilience, data platforms and SaaS delivery – aligning IT to the outcomes the business truly needs.

**“TECHNOLOGY ONLY
CREATES VALUE WHEN
STRATEGY, DELIVERY,
AND PEOPLE ARE ALIGNED
– WITH CLARITY,
RESILIENCE, AND
EXECUTION DISCIPLINE.”**

INTRODUCTION

Rocco Volpe is a senior strategic technology leader with 25+ years of experience stabilising IT services, modernising platforms, and delivering digital transformation across professional services including finance and security, and the public sector. He is known for stepping into complex environments, understanding the current state, rapidly diagnosing issues and improvements, and turning strategy into practical delivery. Rocco brings calm, people-first leadership and extensive expertise across Azure cloud modernisation, cyber security uplift, ITIL-aligned service management, data and BI platforms, pragmatic AI enablement and SaaS product delivery – focused on building resilient foundations that support sustainable business value and growth.

HOW I CAN HELP YOUR BUSINESS

- **Technology Strategy & Service Stabilisation:** Leads rapid assessments of IT services, operating models, and delivery risk – creating clear strategies and roadmaps that restore control, confidence, and performance.
- **Cloud, Infrastructure & Modern Workplace Transformation:** Delivers Azure and M365 migrations, resilience and DR/BCP improvements, and modern workplace uplift – balancing security, cost efficiency, and operational reliability.
- **Cyber Security, Risk & Resilience:** Strengthens cyber posture through pragmatic uplift programmes, governance, and policy alignment – supporting secure operations and regulatory expectations without overengineering.
- **Data Platforms & SaaS Product Ownership and Delivery:** Designs and delivers data and BI platforms, system integrations, pragmatic AI enablement and full lifecycle SaaS product development – turning data insight, automation, and product thinking into measurable business value.
